

CATLINK

CL-EMOUT6EL

INFRARED REMOTE CONTROL DISTRIBUTION

EMITTER OUTLET + EQUIPMENT ADAPTER

The *Catlink Emitter Outlet & Equipment Adapter* provides 6 emitter outlets and an “*Equipment Link*” adapter lead allowing linking of the *Catlink* system to other IR control systems.

Intended for mounting in a equipment rack this accessory provides a tidy and integrated solution to installing emitters on equipment in the rack (rather than using multiple emitter adapter leads). The *Equipment Link* connection allows connection to other infrared control systems that provide an “*IRout*” connector. Any signals received on this connection are repeated out the *Catlink* network.

Equipped with two leads, one terminated with a RJ45 jack for plugging into the *Catlink* network and one terminated with a 3.5mm phone jack for plugging into the ‘*IR out*’ of equipment to be linked with *Catlink*.

Provided with case flanges for screwing to wall or bracket.

Specifications

<i>Part Number</i>	CL-EMOUT6EL
<i>Number of Emitter Outlets</i>	6
<i>Dimensions (not including flanges & cables)</i>	80mm (W) x 57mm (D) x 34mm (H)
