

The Catlink flush mount receiver head insert accommodates flush wall or ceiling mount applications.

Designed to click directly into HPM® compatible wall plates, this receiver head is very tidy, easy and quick to install.

This receiver head offers wide reception angle and excellent operation in bright or sunlit room situations.

PART# CL-IRM0238IH

CATLINK receiver head insert for HPM® wall plates

The exclusive Infrared lens mounted at the front provided enhanced operating angle approaching 160°.

Equipped with two screw terminals for connection to a receiver pair of a Catlink network and fully protected against accidental reverse connection or connection to telephone system voltages.

Equipped with a blue 'Talk-back' indicator light mounted behind the Lens and flashes whenever infrared signals are received.
